CONTACT

- edvin.sanne@gmail.com
- +46 76-018 39 94
- Tämnarvägen 22, Årsta, Stockholm

EDUCATION

Fullstack - LTU & Lexicon
2025-2026
Practical software development course in Fullstack development with .Net focus

- C# programming
- Frontend/Web Design
- Databases
- AI-assisted development
- Automation
- Code testing(Xunit, others)
- Cybersafety/Security
- Networking

Digital Narration and Cultural Heritage - Master, Högskolan i Skövde
2022–2023
Narration in new media as research subject. Developed the Mariestad Climate Game

Game Design - Bachelor
Högskolan i Skövde
2019–2022

- Game Design
- Prototyping
- Programmering,
- Unity och C#,
- Creative Writing
- Experimental Game Mechanics
- Games User Experience
- Rules systems and game theory

PROFILE

Game Designer with a passion for strategy games. Great at working in teams and prototyping new concepts. Experienced programmer. Avid board gamer, ttrpg player and DM, and fan of fantasy and scifi worlds

WORK EXPERIENCE

Merchandiser | Retail24
2025
Took part in the launch of new apple products, setting up new demo example Ipads and Macbooks in stores.

Board Game Designer | Municipality of Mariestad
2022-2024
Made a strategic board game about making a city climate neutral. The game was printed and published in spring of 2024, and is now used in schools and by different groups in the municipality.

- Did the game and card design for the game.
- Designed and balanced over 100 cards in the game.
- Organized many playtests for different groups
- Made a card setup script and digital version in Unity.

Internship | Ion Game Design
2024 + 2025
Had a three months (total) internship at Ion Games, a board game studio in Stockholm split of over summer 2024 and fall 2025

- Designed and programmed a tutorial for the digital version of High Frontier 4 All.
- Implemented nested tooltips and other UI improvements in that game.
- In 2024, worked with game design on multiple board games

Summer Job | Stockholm Stad
2019
Made a short movie for Årsta-Enskede-Vantör district in Stockholms city.

- Planned the movie and scouted for locations to shoot in.
- Aided in the recording and handled sound.
- The movie was used in advertisement for the district

PROJECTS

Kastorix | TTRPG
2023-
TTRPG that I'm developing during my free time. Based on Pathfinder 2e rules with new magic systems and focus on magitech. I'm also developing a website for it with an interactive Character Sheet for players to plot out their characters.

- Character Sheet
  https://acasez.github.io/Kastorix/InteractivePages/CharactherSheet

COURSES

Mathematical models in game programming - Högskolan i Skövde. 2025

UI/UX Design - Uppsala University. 2024-2025

App development for Android - Uppsala University. 2024

SKILLS/COMPETENCIES

Programming

- C# (strong)
- Unreal Blueprints
- C++
- Java/Kotlin
- JavaScript/Typscript
- CSS/HTML
- Python (basics)
- SQL/SQLite (basics)

Software

- Unity (strong)
- Git (strong)
- Google Drive/Docs/Sheet (strong)
- React
- Unreal
- Microsoft 365
- Windows 10/11
- React
- Blender (basics)
- Figma (basics)

Other

- Game Design (strong)
- Level Design (strong)
- UI/UX Design (strong)
- Board Games (strong)
- TTRPG's
- Worldbuilding
- Prototyping
- Documentation
- Game Balance

Languages

- Svenska (native)
- Engelska (fluent)
- Japanska (basics)

- Infopage https://acasez.github.io/Kastorix/RPG%20Overview

Edvins Nested Tooltips | Unity Asset

2025

System for nested tooltips in Unity, designed to allow anyone easily add nested tooltips to their game

- Used in High Frontier 4 All
- Flexible keyword system for any complex games
- https://acasez.itch.io/edvins-nested-tooltips

Board Member | Skövde University Gaming Society

2022-2025

- Was part of the board of the board and wargames club SUGS, with over 50 members
- Handled new board game purchases and requests

City State | Turn Based City Builder

2021-2022

City Builder, created for my bachelor thesis about tech tree structure. Made in Unity using C#

- Over 150 browser plays,
- Has two tech tree variants, traditional and semi-random
- https://acasez.itch.io/city-state

To Hel and Back | 10HP Studio

2021-2022

Hack n slash roguelike, originally developed as part of a school project, part of the group continued working on the project afterwards. Made in Unity.

- Worked as lead designer and worked on game systems, combat and level design
- Balanced the game iteratively based on playtests and feedback.
- The game was nominated for the SAGA award at Sweden Game Conference 2021.
